- Core products are ammonia related products and sulfuric acid related products
- FY2021 ammonia domestic production capacity share 11%
- Focus on high value-added products, such as high purity sulfuric acid and TEPIC, instead of pursuing scale

Restructure based on Shutdown of Melamine Plant

- As announced in August 2021, the production of melamine terminated in June 2022 and end sales in December 2022
- We will concentrate its management resources on high value-added products and products with a high market share

1. Sales・OP distribution (Total FY2018-2021)

(¥billion)

	Sales	OP	Main products
Ammonia-related products	92.5(66%)	1.9(20%)	ammonia, urea/AdBlue®, high purity ammonia, melamine, nitric acid, isocyanuric acid, Hi-LITE, TEPIC, melamine cyanurate
Sulfuric acid-related products	47.0(34%)	7.7(80%)	sulfuric acid, purified sulfuric acid, high purity sulfuric acid
Others			FINEOXOCOL etc.
Total Chemicals	139.5(100%)	9.6(100%)	

*Among ammonia-related products, melamine has the highest sales but is in the red
 *Total profit of ammonia-related products other than melamine is in the black

2. Current status and prospects of melamine

Unlikely to secure stable profits in mid-long term, and to expect profit expansion by new investments

- World production capacity is twice of demand (our estimate)
- Domestic production capacity (2 companies including Nissan Chemical) is 3 times of demand (our estimate)
- Prices are on recovery trend, but always unstable due to cheaper Chinese products
(Chinese production capacity accounts for about 70% of the world)

3. Actions to be taken

- (1) Melamine: (A) stop production permanently in June 2022, (B) end sales when inventory eliminated
- (2) Expand sales of Chemicals segment by concentrating on high value and high share products
- (3) Reassign melamine plant operators in Toyama plant
- (4) Continue to sell melamine derivatives by purchasing melamine as raw materials

4. Restructuring costs

Melamine plant shutdown related costs (extraordinary loss of 1.79 billion yen) were compensated by gain on sales of investment securities (recorded in 2Q FY2021)

5. ESG

By shutdown of melamine, 26,000 GHG (t-CO₂) or equivalent to about 7% of FY2018 GHG (see p46) estimated to be reduced
