## New Segmentation (From 2Q 2011)

Reflecting organizational changes implemented in June 2011

- Major organizational change

Creation of Performance Materials Division to consolidate Electronic Materials Division and Inorganic Materials Division aiming to strengthen performance materials business which is identified as our major growth engine

- Major changes in segmentation

Creation of Performance Materials
Change in Chemicals
$\rightarrow$ Electronic Materials + Inorganic Materials
$\rightarrow$ Inorganic Materials shifted to Performance Materials Creation of Fine Chemicals subsegment, abolishment of Organic Materials subsegment Environmental Chemicals (HI-LITE) shifted from basic Chemicals to Fine Chemicals

## Diversified Product Portfolio

Consisting of products holding strong position in market

Dominant share in domestic market (SNOWTEX)

## NCl's Advantages

- Wide variety of grades to accommodate diversified customer's needs
-••particle diameter, surface treatment, concentration, PH , etc.
< Characteristics >
High transparency
High hydrophilicity
High heat resistance
High electro-conductivity
High hardness
Control refractive index
Increase friction
Increase bonding
Increase viscosity

< Key functions >

< Application Examples >

Coating for plastic optical lenses, metals, plastic films

Catalyst carrier, Binder for ceramics
$\cdots$ long-term product stability, large-sized sol, etc.
